

Please leave Indiana's law alone. The people of our country today live such a hectic lifestyle that we are suffering as a country from too little family time or just plain down time to relax. These solicitation phone calls are such an invasion and unbelievable annoyance on that time. It has been such a delight not to feel that resentment and anger well up when I pick up the phone and have someone I want to talk to on the other end. Just being able to hang up on them doesn't remove the annoyance of feeling attacked on MY time. Thank you for your consideration.
